

Stanford EE Computer Systems Colloquium
Wednesday, February 15th, 2017, 4:30pm
Gates Computer Science Building, Room B3

Andreas Weigend will share his journey from starting as a PhD student at Stanford in neural networks, to becoming the Chief Scientist at Amazon, and ultimately writing the book *Data for the People* that came out last week (and made it to Times Square).

Sign up at ourdata.com/tour by this Sunday, February 12th, and get an electronic copy of the book. Read it. Then bring your questions to the talk on Wednesday afternoon!

Andreas Weigend just published his book on big data, transparency and what to do about it. He was the Chief Scientist at Amazon, where he helped create the company's culture of data and innovation.

Andreas has taught courses at Stanford in CS, MS&E, Psychology, Statistics and in Thinking Matters. He is now a lecturer at UC Berkeley. He is also a mentor at StartX and a limited partner at Founders Fund, focusing on social-local-mobile technologies and consumer behavior.

Andreas is the founder and director of the Social Data Lab. Clients include Alibaba, BMW, GE, Hyatt, Deutsche Telekom, Lufthansa, MasterCard, Tencent, and the World Economic Forum. He lives in San Francisco, Shanghai, and on weigend.com.
